

Preparing your data and code for reproducible publication:

A hands-on workshop for researchers

August 20, 2018 | 1pm - 4pm

IVES 111, School of Industrial and Labor Relations
Cornell University

Computational analyses are playing an increasingly central role in research. This is a step-by-step, practical workshop to prepare your research code and data for computationally reproducible publication.

Workshop goals:

- Learn best practices for file organization, documentation, automation, and dissemination.
- Assess possible tools for publishing code and data.
- Submit your code and data for publishing on Code Ocean.

Participants should bring their own research data and code. Computers are available to use in the computer lab or participants may use their own laptop.
